Lives Impacted to Date

Thank you for your incredible generosity and belief in Design Outreach's mission to transform communities physically, economically, and spiritually.

Because of your faithful support through our Beyond Measure campaign, we have been able to reach more people with sustainable solutions and the hope of the Gospel than ever before.

Key Milestones this Quarter

- Exceeded 1 million people reached with DO technologies.
- Launched partnership with World Hope Ministries International to provide theology training to local pastors.
- Completed 3rd district for our Afridev MaxLife Centralizer district pilot program.

100%
to Goal of Reaching
1 Million People

MaxLife Program Developments

We are thrilled to share that, in Q2, we officially reached 1 million people with sustainable solutions to alleviate global poverty through our Beyond Measure campaign. We give thanks to God for his grace and provision that allowed us to achieve this goal months ahead of schedule.

One of the driving forces behind this achievement is our Afridev MaxLife™ Centralizer district pilot program through which we are installing MaxLife Centralizers, training area mechanics, and stocking local shops to transform water access in Malawi one district at a time. In Q2, we completed the program in the first 3 districts—Lilongwe, Dedza, and Dowa—with more districts launching this year. To date, as part of this project, we have installed MaxLife Centralizers on **1,200 Afridev hand pumps serving 300,000 people**. So far, **168 area mechanics** have received specialized training to install and maintain MaxLife Centralizers, and **46 shops** have been stocked with inventory.

In total, across both the Afridev and MaxLife India Mark 2 programs, we have reached 488,750 people with MaxLife upgrades.

Testimonies of Transformation

Before the MaxLife Centralizer, **Lucy Shart's** community pump broke down every three months, draining her tomato-business earnings on repairs and forcing her family to drink from an unsafe water source that made her children sick. Since installation in December 2025, the pump hasn't broken once. Lucy now has the funds to invest in her children's education and her business.

"After installation of the blue centralizer, we have seen that it's very strong," said area mechanic **Staford Kangadze**, who oversees 112 pumps serving about 12,000 people. "Now we are going into the seventh month without changing centralizers and there were no breakdowns. I also have time to do other work at my household because I'm not frequently visiting the communities doing maintenance."

Village Chief **Tikamawa Thenifold** reported that her community's pump, which broke down 26 times each year, has experienced zero failures since receiving the MaxLife Centralizer. "With the blue centralizer, no sicknesses, people are having potable water all the time, and no one fights with the chief anymore about giving money to repair the pump."

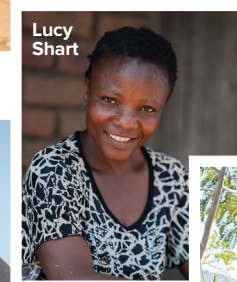

Nearly every community we spoke with reported that, with the MaxLife Centralizer, their pumps not only became more reliable but also easier to use. The result has been more money for investing in household and community development and more time and energy for children to attend school. As **Harrison Phiri** from Dedza District said, "Thanks a lot as they (Design Outreach) have given us durable centralizers, and may the Almighty God bless them that they should continue manufacturing other parts and plan for a lot of interventions. Everything which they are planning, please, our village must be on the list."

A New Gospel Partnership

Clean water opens the door, but the Gospel transforms. That is why, in Q2, we began a partnership with World Hope Ministries International (WHMI), a nonprofit committed to making theological training accessible to every pastor and ministry leader in the world. Alongside our MaxLife Program, we will be working with WHMI to provide free, local biblical education to pastors in Malawi, equipping them to train and disciple others. In addition, we are continuing to provide physical and audio Bibles and preach the Gospel to the communities we serve.

What's Next?

As we continue to expand access to MaxLife upgrades across Malawi, our next goal is to reach 10 million people with Design Outreach solutions by 2030. None of this work would be possible without people and organizations like you—thank you for your partnership in the Gospel!

How You Can Pray

- For wisdom as we navigate scaling up MaxLife Centralizers in rural communities and for meaningful progress toward our goal of reaching 10 million people.
- For continued growth of our Gospel outreach program, for the pastors who will receive training, and for those who will hear the Gospel for the first time.
- For fruitful partnerships with organizations, governments, shopkeepers, and mechanics as we continue to scale the MaxLife Centralizer.
