OCTOBER 2026

Quarterly Impact Report

110,495
People Impacted Through Gospel Outreach

3,262
Communities Reached

1,191,122
Lives Impacted to Date

Thank you for your incredible generosity and belief in Design Outreach's mission to transform communities physically, economically, and spiritually.

Because of your faithful support through our Beyond Measure campaign, we have been able to reach more people with sustainable solutions and the hope of the Gospel than ever before.

Key Milestones This Quarter

- Completed the fourth district in our Afridev MaxLife™ Centralizer district pilot program.
- Reached 1,000+ more people with the Gospel in Q3 alone.

MaxLife Program Developments

Since achieving our goal of reaching 1 million people with sustainable solutions, the momentum we've been building continues to grow. Already, we have reached nearly **1.2 million people** across the globe. A huge reason for this rapid expansion is our Afridev MaxLife Centralizer district pilot program.

In Q3, we completed the program in our fourth district. We now have MaxLife Centralizers in Lilongwe, Dedza, Dowa, and Mchinji Districts installed on a total of 1,600 Afridev hand pumps serving 400,000 people. Since last quarter, an additional 45 area mechanics received specialized training to install and maintain the centralizers, and another 15 shops were stocked with inventory. To date, a total of 213 area mechanics have been trained, and 61 local shops are stocked with centralizers for communities to purchase when needed.

In total, across both the Afridev and India Mark 2 (IM2) MaxLife programs, we have reached 627,000 people with MaxLife upgrades.

Safe Water & the Gospel

This quarter, we traveled to Mwayasunka Village and United Church of Zambia to check on the performance of an IM2 hand pump that was upgraded as part of the IM2 MaxLife pilot program.

This pump serves approximately 1,300 people in a community that is home to more than eight churches.

Pastor Dennis Mizhi told us the community was given this land by a farmer as a place to spread the Gospel, but they needed water. The government eventually drilled a well and installed a pump, but the metal pipes rusted quickly. The pump broke down after just a few months, and it would take two to four months to repair it each time. Fortunately, these struggles are behind them.

"From the time [the MaxLife Upgrade] was installed, the pump has never broken down, which is giving us hope and faith," he said. "People can come and have access to water. We are very much thankful to our Heavenly Father for bringing on board Design Outreach and Living Water International."

With safe water, the local church is growing, and more and more people are hearing the good news of the Gospel. This is just one example of the Gospel impact our programs have, and we are grateful for the opportunity to share the love of Jesus with those we serve.

What's Next?

As we continue MaxLife upgrades across sub-Saharan Africa, our next goal is to reach **10 million people with Design Outreach solutions by 2030.** None of this work would be possible without people like you—thank you for your partnership in the Gospel!

How You Can Pray

- For wisdom as we navigate scaling up MaxLife Centralizers in rural communities and for meaningful progress toward our goal of reaching 10 million people.
- For continued growth of our Gospel outreach program, for the pastors who will receive training, and for those who will hear the Gospel for the first time.
- For fruitful partnerships with organizations, governments, shopkeepers, and mechanics as we continue to scale the MaxLife Centralizer.
